Plants will be available for pick up or delivery December 1-3.

### Tips:

1. Most successful programs sell to businesses, offices and churches. Even a small office can use 25-50 plants and they make great client gifts.
2. Plants will need to be delivered as soon as possible. Poinsettias are living things and they cannot go very long without light and water.
3. Poinsettias are NOT poisonous. This is myth that won't go away.
4. Plants will come in sleeves for ease of transporting. Final consumer should unsleeve the plant and water.
